## Full Stack Web Developer

### CAREER OBJECTIVE

As a trainee at Orange Coding Academy, I am actively developing my skills in web development, focusing on HTML, CSS, JavaScript, Bootstrap, TypeScript, ASP.NET Core MVC, Angular and Core API. Throughout my training, I have worked on eight projects, contributing to both front-end and back-end development, as well as database management. In one of these projects, I took on the role of Scrum Master, leading my team using Agile methodologies, which strengthened my skills in project management, teamwork, and problem-solving. Additionally, I have developed strong soft skills, including communication, leadership, and adaptability. I am currently seeking opportunities in web development where I can apply my expertise and continue growing in a dynamic and innovative environment.

### Technical Skills

**Front-End Technologies:** HTML, CSS (Bootstrap), JavaScript, TypeScript and Angular.

**Back-End Technologies:** C# (OOP), ASP.Net Web Form, ASP.Net Core MVC and ASP.Net Core API.

**Database:** SQL, SQL Server

**Software Development Practices (SDLC):** Scrum, Agile

**Other Tools:** Git (Version Control Systems), GitHub, Figma, Trello.

### Soft Skills

Self-Motivation Continuous Learning Decision-Making & Prioritization	Critical Thinking Problem-Solving Ability Project Management Active Listening	Time Management Teamwork & Collaboration Effective Communication

### Experience

**Orange Coding Academy, Irbid-Jordan**

**Dec 2024- Present**

#### Full-Stack Web Developer Trainee

Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)

#### Work Experiences:

- Developed and maintained responsive web applications using HTML, CSS, Bootstrap, JavaScript, TypeScript and Angular, improving user interface and overall user experience.
- Assisted in building and optimizing back-end services using ASP.NET MVC Core, ASP.NET Core API, and SQL, ensuring the creation of robust and scalable solutions.
- Collaborated closely with cross-functional teams to deliver high-quality code, fostering teamwork and enhancing project management skills.
- Contributed to the design and implementation of database structures, improving data retrieval efficiency, security, and integrity.

- Implemented secure user authentication and authorization mechanisms for web applications, ensuring data security and privacy.

## Projects

### 1) HR Management System. [GitHub Link](#)

**Description:** A comprehensive HR Management System built using ASP.NET Core MVC to streamline employee lifecycle processes. The system includes features such as employee management, attendance tracking, task assignments, leave requests, and performance evaluations. It utilizes SQL Server for data storage and follows the MVC architecture to ensure scalability and maintainability. Designed to enhance efficiency in managing HR operations within a web development company.

### 2) Library Management System [GitHub Link](#)

**Description:** Developed a Library Management System for a library using ASP.NET Core MVC and SQL Server. The system enables users to register, search for books, borrow books, reserve meeting rooms, and provide feedback while allowing library administrators to manage books, confirm borrow requests, oversee room reservations, review feedback, and generate reports in PDF/Excel. Implemented secure authentication, user profile management, and a password reset feature.

### 3) Photography Store [GitHub Link](#)

Photography Store is a group-based Angular project featuring a user-friendly e-commerce platform where users can browse product categories, view product details, add items to their cart, leave comments, and complete checkout with credit card or Orange Money. Users can manage their profiles, view past orders, apply discount vouchers, and search with filters or voice. Admins have a dashboard to manage products, categories, users, and vouchers. The site includes multi-language support and allows sharing products on Facebook.

### 4) Task Management System [GitHub Link](#)

Personal Task Management System is an MVC-based web application that helps individual users organize and track their daily tasks. Users can create, update, and manage tasks, view progress through dynamic dashboards, and stay productive with real-time status updates and summaries.

## Education

### Orange Coding Academy, Irbid-Jordan

**Dec 2024- Present**

Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).

### Yarmouk University, Irbid/Jordan

**(Apr 2018 - Sep 2022)**

Bachelor's in Biomedical Physics
